Texas Hold-em

Texas Hold-em is a community card poker game that is played with a standard 52-card deck. The game starts to the left of the dealer button. The blind bet(s) are made from the position(s) left of the dealer button and are forced bets which must be made before the cards are dealt. Two cards (hole cards) are dealt to each player, one at a time, face down, in rotation. This is followed by the first round of betting. A player may check, bet, call, raise or fold.

Three cards (the flop) are then dealt face up in the middle of the table as community cards (board cards) and the second round of betting occurs. The fourth community card is dealt face up (the turn), followed by the third round of betting. The final community card (the river) is dealt face up and followed by the fourth (final) round of betting.

At the showdown, each player may use any combination of the hole cards and community cards, or may play the board and use no hole cards to make the highest ranking five-card poker hand. The player with the highest ranking five-card poker hand wins the pot. In the event of a tie, the pot is split equally.

RULES & STANDARDS FOR PLAYERS

The player receives two cards initially. All cards in the game are always dealt face up to all participants. All deals and draws start from the first player position to the right or clock-wise from the Player/Dealer position. After the players receive their first two cards, they may elect to receive additional cards to make their best hand. After all players have made and set their hands, then the Player/Dealer receives his/her second card. The chart provided below are the rules regarding what action a player may take when participating in the game:

RULES & STANDARDS FOR THE PLAYER/DEALER POSITION

The Player/Dealer position occupies the "bank" position at the gaming table. The Player/Dealer places a set amount of money on the table and his/her hand plays

NAPA VALLEY CASINO

against all the player's hands on the table. The Player/Dealer position must rotate in a continuous and systematic fashion, and cannot be occupied by a person for more than two consecutive hands. There must be an intervening Player/Dealer so that one person cannot continually occupy the Player/Dealer position within the meaning of Oliver v. County of Los Angeles (1998) 66 Cal. App. 4th 1397, 1408-09. And in addition to the meaning of AB 1416 (the Wesson Bill) which added section 330.11 to the California Penal Code, relating to licensed gambling establishments and any future regulatory guidelines from the California Department of Justice, Division of Gambling Control, with respect to the operation of a controlled game featuring a Player/Dealer position.

The Player/Dealer is never required to cover all opposing player's wagers. A Player/Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers. If there is not enough money from the Player/Dealer position to cover all winning wagers, the player who received no action on their wager will receive a "free collection" button to use on the subsequent hand.

After all players have exercised their options in standing or drawing additional cards to make the best hand possible, the Player/Dealer receives their second card face up. Once that card is dealt, the casino dealer determines where the "action" button is placed based on the numerical value of the card. The Player/Dealer's hand is then played according to the chart provided below. A Player/Dealer has no options other than to hit on a Soft 17 or lower and stand on a Hard 17 or higher. All players hands are compared against the Player/Dealer's to determine a winning or losing hand.

The house never participates as a Player/Dealer, takes a percentage of the wagers nor has an interest in the outcome of the hand.

<u>Must Stand On</u>	<u>Must Hit On</u>	<u>Optional</u>
Hard 17 and higher	Soft 17 and less	None

The player will then use this disc on the subsequent round of play and will not pay a table fee collection for that round. The free collection button can only be used at that table and for the same betting limit that it was received. It is non-transferable.

DOUBLE-DOWN, SPLIT, SURRENDER & ODDS

1. Players can double-down on their first two cards dealt to them. The player must place a second wager equal to the wager he/she originally placed prior to the start of the game. The player will only receive one card regardless of the total.
2. Players can split any pair or two cards with a value of 10 each, originally dealt to them. The exception is two Aces. The player must place a second wager equal to the wager he/she originally placed prior to the start of the game. A player may draw as many cards as the desire per split card to make the best hand.
3. Players can split any two Aces originally dealt to them but can only receive one extra card per Ace. The player must place a second wager equal to the wager he/she originally placed prior to the start of the game.
4. Players may double-down after a split if the value of the cards meets the requirements outlined in #1, above.
5. Multiple splitting of cards is permitted up to a maximum of three (3) splits per hand.
6. Players can surrender after their first two cards are dealt and half of the wager will be forfeited. Their play for that hand will cease.

NAPA VALLEY CASINO

7. Players cannot double-down, split, or surrender when the Player/Dealer's first card dealt is a Joker.
8. Player's Joker-Joker or "Natural 22" pays 2 to 1. All other hands pay 1 to 1.
9. All pay-offs are to the extent that the Player/Dealer's money covers the action on the table. A Player/Dealer cannot win or lose more than the entire amount of money placed on the table prior to the start of the hand.

ROUND OF PLAY

1. Players choose their spot on the table and place their wagers.
2. A Player/Dealer is identified by a "bank" button placed in front of their seat position. The Player/Dealer places money in front of him/her. This money will be used to pay any winners and the total will only be collected from the losers. The combination of both may not go over the total amount the Player/Dealer placed on the table.
3. After the wagers are made, the players and the Player/Dealer post a pre-determined collection fee in front of their wagers. The casino dealer then collects the collection fee and places them in a secured drop box affixed to the gaming table.
4. All wagering limits and collection fees are pre-determined and prominently displayed at each gaming table.
5. The casino dealer begins to deal cards one at a time, in a clock-wise fashion, starting at the first occupied position to the right of the Player/Dealer's seat position and the "bank" button. A single card is dealt to each player. The Player/Dealer receives their first card in turn but it is placed in front of the casino dealer instead of the actual Player/Dealer.
6. The casino dealer then deals the second card to the players. The casino dealer does not deal a second card to the Player/Dealer. The casino dealer deals additional cards to the players as they request them. After all players are satisfied with their respective hands, the Player/Dealer is dealt their second card.
7. Once the Player/Dealer receives their second card, the casino dealer determines the numerical value of the card and determines where the "action" button is placed. This is accomplished by the casino dealer

NAPA VALLEY CASINO

beginning his/her counting to the right of the Player/Dealer seat position and counting in a clock-wise manner until the number value of the card is reached.

8. The casino dealer continues to draw cards for the Player/Dealer, if necessary until a Hard 17 or higher number is reached. The Player/Dealer does not have an option of hitting a Hard 17 or higher nor staying on a Soft 17 or lower.
9. Once the Player/Dealer's hand has been made, all winners and losers are determined when their cards are compared to the Player/Dealer's. Money is paid or collected on wagers starting at the seat position where the action button was placed and then continues in a clock-wise fashion. The Player/Dealer cannot win or lose (aggregate) more money than they originally placed on the table. If there is not enough money to pay all winning wagers, the Casino may give a "free collection" button to the affected players which will waive the table collection on the subsequent round of play.
10. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, and the Player/Dealer position is rotated in a clock-wise fashion around the table. If there is no person that intervenes on the Player/Dealer position, the game will be "broken."

NAPA VALLEY CASINO

Double Hand Poker (Pai Gow Poker)

Game Description:

Double-Hand Poker is played with 53 cards: a standard 52-card deck and one Joker. The Joker may be used as an Ace or to complete a straight or a flush. The game is dealt on a poker style table to seven players (positions). The dealer button denotes which one of the seven players is the player/banker for that hand.

The house dealer will deal seven hands (piles). Each hand contains seven cards all dealt face down. The player/banker selects one of the seven piles as the first hand to be delivered. The house dealer places an action button on the selected hand.

The dice cup (containing three dice) is shaken by the player/banker to determine which seated player (position) receives the first action hand. The player/banker is always counted as numbers 1, 8 or 15. The dealer will deal each player (position) a pile, which consists of seven cards each. The player/banker's hand is kept face down in front of the house dealer.

The players set their hands (any player may ask for his hand to be set House Way). Out of the seven cards two hands are made, one two-card hand and one five-card hand. The five-card hand (the back hand) must rank higher than the two-card hand (the front hand). The players place their hands face down with the two-card hand in front and the five-card hand in back.

After all players have set their hands, the House Dealer will open the player/banker's hand. The player/banker will determine which way the hand will be set.

Rank of Hands

- (a) Five Aces (g) Straight
- (b) Royal Flush (h) Three-of-a-Kind
- (c) Straight Flush (i) Two Pair
- (d) Four of a Kind (j) One Pair
- (e) Full House (k) High Card
- (f) Flush

Note: An Ace may be played high or low for a 5-card straight.

Example:

5-4-3-2-A = Low straight

A-K-Q-J-10 = High straight

The Joker may be used as an Ace or as any card to complete a straight or as the highest unmatched card in a flush.

Object of the game

To win the hand, both the front and back hands must rank higher than the player/banker's hands. If both of the player/banker's hands rank higher than the player's two hands, the player/banker wins. If only one of the hands ranks higher, it is a push, meaning neither side wins. Each player keeps his bet. An identical hand is called a copy. The player/banker wins all copies.

- The player/banker may only receive action on the amount wagered. Once the player/banker's wager is depleted, the hand is over. It is possible to hold a losing or a winning hand and receive no action, or partial action.
- The player/banker's hand will not be opened until all hands have been set with the exception of a "House Way" hand. (See rules #8 and #9.)
- A player has a foul hand if:

(a) The two-card front hand is stronger than the five-card back hand, or

(b) The player does not have exactly two cards in the front hand, or

(c) The player does not have exactly five cards in the back hand.

A boxed or exposed card on the deal will be replaced by the first of the remaining four cards after the deal is finished.

- A misdeal will be declared if:

(a) A Joker or an Ace is boxed or exposed, or

(b) if two or more cards are boxed or exposed or

(c) the player/banker's hand does not have the correct number of cards.

- A player is responsible for the final setting of his hand. When a player requests assistance on the setting of a hand by the house dealer, a "House Way" button will be placed on the hand. Upon reaching that hand on the pay-off after the player/banker's hand is opened and set, the House Way hand will be opened and set per House Way guidelines. When players have looked at their hands, they may or may not be allowed to ask for a House Way play.
- Management will reset any House Way hand, improperly set by the house dealer.
- The house dealer cannot allow the player/banker to set his hand foul. If the house dealer mistakenly allows a foul hand to be played, it will be reset the most logical way by Management and play will continue.
- The player/banker's hand is not set until he has signified his final decision in an obvious manner to the house dealer.
- Any player may request a new set up before the first bank. Only the player/banker may request a change of deck between the first and second bank.
- When two identical cards are turned up, the hand will be declared a misdeal.
- A hand that has been misread by the house dealer will play at true value if it can be retrieved intact.
- If the hand goes to the wrong spot before the dice cup is closed, it is a misdeal.
- The Floor person's decision is final in all disputes and in the interpretation of all rules.

OBJECT OF THE GAME

The object of the No-Bust 21st Century Blackjack is for the Players and the Player/Dealer to add the numerical value of their cards and:

- Draw additional cards if needed.

VALUE OF CARDS

A plural standard deck of cards with no Joker is used in the play of the game. The game can be played with a minimum of one (1) and a maximum of eight (8) decks.

b) 1 or 11 with all cards with value of 2-9 .

ROUND OF PLAY

1. No-Bust 21st Century Blackjack is played on a raised gaming table. The table seats eight players who face the Dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino Dealer stands opposite of the players, and in the center of the table. The casino Dealer's chip tray is set in front of him/her. The play starts from the left of the dealer and proceeds in a clock-wise fashion.
2. The game utilizes a 52-card deck with special bonus aces . The aces are bonus cards with the value of:
 - a) 11 and a half on first two cards with all cards with the value of 10's.
 - b) 1 or 11 with all cards with value of 2-9 .
 - c) 1 or 11 with three or more cards.
3. the game can be played with a minimum of a one deck, totaling 52 cards and to a maximum of eight decks totaling 416 cards.
4. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed, and collection fee for the Players and Player/Dealer. A maximum of three collection rates are allowed in compliance with the California Penal Code.
5. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer will place an amount of money (casino chips) in front of their seat in a betting circle and that money will be used to pay the winners and will also set the amount that he/she can collect from the loser. The casino will place a "button" in front of the Player/Dealer which designates that they are taking the "Player/Dealer" position and further designate whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the collection fee in front of his betting circle.
6. Players at a table then place their wagers in designated betting circles. The Players may place a wager at his/her seat along with other unoccupied betting circles. Each Player must pay the posted collection for the wager they placed in any betting circle where they have money or "action".
7. Once the Player/Dealer has posted the amount of money he/she will wager against the other Players, and once the Players have placed their wagers, the casino dealer will collect all of the fees. This will always be accomplished prior to the start of the game in accordance with the California Penal Code. The casino dealer will take the collection fees and drop them into a locked collection box affixed to the gaming table.
8. After the fees have been collected, the Dealer will deal the cards to the Players and the Player/Dealer. All cards dealt throughout the game are always dealt face up. The casino Dealer is the only person on the table to touch the cards. The Players will signal to the Dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino Dealer deals the first card to the Player seated to the left of the designated Player/Dealer, in a clock-wise fashion. Each Player will be dealt one card face up and the Player/Dealer will receive his/her first card also. The Player/Dealer's first card will be placed in front of the casino dealer rather than in front of the Player/Dealer's seat position.
9. The casino Dealer will deal a second face up card to the players, again starting at the Player to the first seated position to the left of the Player/Dealer, in a clock-wise fashion. The Player/Dealer will receive a face down card.

10. Players must follow the below listed chart in deciding whether to hit or stand on a particular hand:

Rules For Player		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Soft & Hard 21 "Naturals"	11 Or Less	12
		13
		14
		15
		16
		17
		18
		19
		20

11. After all Players have made their best hands by indicating to the casino Dealer that they do not wish to have additional cards dealt to them, the house Dealer will turn over the Player/Dealer hole card. This card will determine where the "action button" will be placed.
12. The Action Button determines where the action starts or who will be first to be paid for their winning hand or lose their wager. The Action Button is placed based on its numerical value and in comparison to the Players seated at the table. (Please see the chart below for an example of how the card's value is used to determine the placement of the Action Button.)

13. Once the hand is played to the end, the payout or collection of the wagers will begin at the seat where the action button is placed. The settling of the wagers will proceed in a clock-wise manner until all wagers have been acted upon.
14. In the event that the Player/Dealer does not have enough money on the table to cover all the wagers on the table, there will be no free collection button, refund, or other conciliatory action give to the affected Players by the casino or the Player/Dealer.

15. The Player/Dealer's cards will always be dealt and placed in front of the casino Dealer's tray. The placement of the Player/Dealer's cards is standard in all games and is depicted in the chart below:

16. The casino Dealer continues to draw cards for the Player/Dealer, if necessary until a Hard 17 or higher number is reached. The Player/Dealer does not have an option of hitting a Hard 17 or higher nor staying on a Soft 17 or lower. See the chart below for details:

Rules For Player/Dealer		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Hard 17 And Above	Soft 17 Or Less	None

17. Once the Player/Dealer's hand has been made, all winners and losers are determined when their card's numerical value are compared to the Player/Dealer's. The Player/Dealer is never required to cover all opposing player's wagers. A Player/Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers. If there is not enough money from the Player/Dealer position to cover all winning wagers, there will be no refund, free collection, or other form of rebate given to the affected Players.
18. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, the Player/Dealer position is rotated in a clock-wise fashion around the table.
19. The next round of play begins once the casino Dealer collects all cards from the table and places them in the discard tray. The casino Dealer will also change the Bank Button, and if necessary (if the same person has already held the Player/Dealer position twice) rotate the Player/Dealer position clock-wise to the next position on the table. If there is no person that intervenes on the Player/Dealer's position, the game will be "Broken" or stopped, as required by the California Penal Code.

ROUND OF PLAY

1. 21st Century Blackjack 8.0 Buster Blackjack is played on a raised gaming table. The table seats eight players who face the Dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino Dealer stands opposite of the players, and in the center of the table. The casino Dealer's chip tray is set in front of him/her. The play starts from the left of the dealer and proceeds in a clock-wise fashion.
2. The game utilizes a 52-card deck with special marked "Bonus" aces. The aces hold the following value:
 - a. 11 ½ on first two cards with all cards with the value of 10's.
 - b. 1 or 11 with all cards with value of 2-9.
 - c. 1 or 11 with three or more cards.
3. All tables will have signage displaying the name of the game along with the minimum and maximum wager allowed, and collection fees for the Players and Player-Dealer.
4. A standard round of play begins when a Player-Dealer is designated. The Player-Dealer places a wager in front of her betting circle. This wager is used to pay the winners. The casino will place a "button" in front of the Player-Dealer and a designation whether it is the first or second turn for the Player-Dealer in the banking position. The Player-Dealer will place the collection fee in front of his betting circle.
5. Players at a table then place their wagers in designated betting circles or other unoccupied betting circles. Each Player must pay the posted collection for their wager(s) in any betting circle where they have money or "action".
6. Prior to the start of play, the casino dealer will take the collection fees.
7. Play commences with the casino Dealer distributing the cards to the Players and the Player-Dealer. The Players will signal to the Dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino Dealer deals the first card to the Player seated to the left of casino Dealer, in a clock-wise fashion. Each Player will be dealt one card face up. The Player-Dealer's first card will be placed in front of the casino dealer.
8. The casino dealer will deal a second card to the players, again starting with the Player to the left of the Player-dealer, in a clock-wise fashion around the table. After all players have received a second card, the Player-Dealer will receive their second card, which will be placed in front of the casino dealer face down. The player-dealer's face-down card shall be checked for a "Natural" when the player-dealer's face-up card is a "Bonus" Ace card. If the Player-dealer is dealt a "Bonus" Ace face-up, Players will be asked if they would like to place an "Insurance" wager. Players may either decline this or place an "Insurance" wager by betting an amount equal to half of their game wager. After each player has been given the opportunity to place an "Insurance" wager, the house dealer will check the Player-dealer's face-down card. If the player-dealer has a "Natural," players shall not be given the opportunity to draw additional cards and the hands shall be compared immediately.
9. If the player-dealer does not have a "Natural," each player is given an opportunity, starting with the player seated to the left of the player-dealer and continuing clockwise around the table, to "Hit" and be dealt additional cards to make the best possible hand.

A Soft hand is achieved when a hand contains an Ace with a combination of two or more cards that add up to 10.

A Hard hand is achieved when a hand contains an Ace with any combination of three or more cards adding up to 21. In the event that the hand includes an Ace, the Ace is counted as 1, not 11.

10. After all Players have made their best hands by indicating to the casino Dealer that they do not wish to have additional cards dealt to them, the casino Dealer will turn over the Player-Dealer hole (second) card.
11. Beginning with the player to the right of the casino dealer, the settling of the wagers will be done in a counter-clockwise manner until all wagers have been acted upon. A player’s game wager will be settled first and the Buster Bet Side Bet will be settled second.
12. The Player-Dealer’s cards will always be dealt and placed in front of the casino Dealer’s tray.
13. The casino Dealer continues to draw cards for the Player-Dealer, if necessary until a Hard 17 or higher number is reached. The Player-Dealer must follow the following hit rules:

Rules For Player-Dealer		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Hard 17 And Above	Soft 17 Or Less	None

A Hard hand is achieved when a hand contains a combination of three or more cards totaling 17. In the event that the hand includes an Ace, the Ace is counted as 1, not 11.

A Soft hand is achieved when a hand contains a combination of two or more cards totaling 17 with an Ace counted as 1 or 11.

14. Once the Player-Dealer’s hand has been made, all winners and losers are determined by comparing the numerical value of the Player’s hands with the Player-Dealer’s hand. The Player-Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers.
15. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, the Player-Dealer position is rotated in a clock-wise fashion around the table.

Description of Table Used and Total Number of Seated Players

An industry standard Pai Gow Poker table will be used to play Fortune Pai Gow Poker 1.0. A table felt with the game name and segregated marked Fortune Bonus Bet areas will be printed on it. Backline betting is permitted on all wagers.

Fortune Pai Gow Poker 1.0 is played on a standard Pai Gow Poker table which seats a maximum of seven players including the player-dealer position. The game may be played on a larger table that seats more than seven players; however, a maximum of seven players may be active in the game during each round of play.

Dealing Procedures and Round of Play

Napa Valley Casino will have the option of either using a shuffling machine or manually dealing the cards.

When using a shuffler, Napa Valley Casino will have the player-dealer shake the dice cup to determine who has first action and who will be delivered the first hand. All positions will receive a 7-Card hand, one by one from the shuffler.

Fortune Pai Gow Poker 1.0

The casino dealer will complete the deal of seven piles of seven cards face down in front of the casino dealer. When dealing the seven piles of seven cards, the casino dealer shall deal one card at a time in front of them until there are seven cards, starting from **left to right**. Once there are seven cards laid out, the casino dealer shall deal each pile another card, from right to left, giving each pile a total of two cards. This process of dealing cards left to right, then **right to left**, shall be completed until each pile has seven cards. The remaining four cards shall be placed in the discard pile.

Once the cards have been stacked, the player-dealer randomly selects which pile will be distributed to the first player who receives the "Action" button. The casino dealer identifies the hand by placing a button marked "Action" on this pile, pushing it forward and turning the pile behind it side ways.

To determine the placement of the "Action" button, the player-dealer shakes a dice cup containing three standard dice. The sum of the dice indicates to which seat the first pile of seven cards will be distributed. The player-dealer's position is always one, eight, and fifteen. Other seats, in clockwise rotation, respectively represent the other numbers. If the numerical total of the dice are one, eight, or fifteen, the player-dealer shall receive the first set of cards and the player to the left of the player-dealer shall receive the "Action" button. Wagers shall be settled in a clockwise manner around the table, starting with the player with the "Action" button. Furthermore, all wagers shall be settled from seat to seat in the following order: the Fortune Pai Gow Poker 1.0 game wager, then the Fortune Bonus Bet wager, and then the Envy Bonus. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players.

Once the "Action" button position is determined, the casino dealer shall distribute the seven piles of cards, starting with the pile that has the "Action" button and continuing clockwise around the table. All seven piles of cards will be distributed to all seats at the table, regardless of whether a player is seated at each position or a wager has been placed. Once all of the piles of cards have been distributed, the casino dealer will collect the cards distributed to seats without a wager and place them in the discard pile.

Each player and the player-dealer shall put up any bets they wish to place for the next hand. Players have the option of placing a Fortune Bonus Bet wager at this time as well.

The casino dealer will then follow dealing procedures and standards of play, as described above.

Once the cards have been distributed, each player shall set their hands by arranging the seven cards into a two-card hand which is placed in front of the five-card hand, and a five-card hand which is placed behind the two-card hand. The five-card hand must rank higher than the two-card hand, according to the ranking of hands, as shown above. Player's may ask the casino dealer to place their hand "House Way" according to the chart below.

When all players' hands have been set, the casino dealer exposes the player-dealer's hand, and sets their hand.

Fortune Pai Gow Poker 1.0

Each player's five card hand will be compared to the player-dealer's five-card hand, and each player's two-card hand will be compared to the player-dealer's two-card hand, in turn, starting with the "Action" button.

How Winners are Determined and Paid

The Fortune Pai Gow Poker 1.0 game wager wins if the two-card hand and the five-card hand held by the player ranks higher than the player-dealer's two-card hand and the five-card hand. Winning Fortune Pai Gow Poker 1.0 game wagers are paid 1 to 1.

The Fortune Pai Gow Poker 1.0 game wager loses if the two card hand and the five card hand held by the player ranks lower than the player-dealer's two card hand and the five card hand.

The Fortune Pai Gow Poker 1.0 game wager "pushes" if one of the hands held by the player ranks higher than the player-dealer's corresponding hand, and the player's other hand ranks lower than the player-dealer's corresponding hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a "push" and is returned to the player.

If one hand is identical in rank to the player-dealer's hand, it is a "copy hand." The player-dealer wins all "copy hands."

Once the standard Pai Gow Poker wagers are settled (win, lose, tie/push) the casino dealer will determine if the player's hand qualifies for the Fortune Bonus Bet and/or the Envy Bonus.

The Fortune Bonus bet considers the best hand possible among the player's seven cards.

If the player's hand qualifies for payouts, the player is paid according to the posted pay table.

- The casino dealer leaves the "Envy" button, if applicable, next to the player's original wager and payouts. The casino dealer will not pick up "Envy" buttons until all wagers are reconciled.

If the player's hand does not qualify for payouts, the player-dealer collects the Fortune Bonus Bet wager.

- The casino dealer leaves the "Envy" button, if applicable, next to the player's Fortune Pai Gow Poker 1.0 game wager and payouts. The casino dealer will not pick up "Envy" buttons until all wagers are reconciled.

The player-dealer pays any Envy Bonuses at the end of the round.

- If at least one player has a Four of a Kind or higher, all players with "envy" buttons win (see pay table).
- In the event more than one player has at least Four of a Kind, then all players with "envy" buttons win multiple payouts.
- A player cannot win an Envy Bonus for their own hand or for the player-dealer's hand.

The player-dealer collects all losing Fortune Bonus Bet wagers and pays all winning Fortune Bonus Bet wagers.

The cards are collected, shuffled, and a new round begins.

Bonus Bets

Fortune Bonus Bet

For each seated position, there shall be one separate and specifically designated area for the placement of a Fortune Bonus Bet wager. A player may place a Fortune Bonus Bet regardless if they have also placed a Fortune Pai Gow Poker 1.0 game wager. The Fortune wager may exceed the base game wager.

The Fortune Bonus Bet takes into account the first seven (7) cards dealt as a player's hand. In the event that the first seven (7) cards dealt to a player that placed a Fortune Bonus Bet wager is a pre-determined and designated qualifying hand, as shown below, the Fortune Bonus Bet wager shall win. The player shall then receive a monetary payout based on the bonus hand that the player has received and the payable, as shown below. Any other combination of the first seven (7) cards dealt, other than the hands shown below, shall lose. There is no opportunity for the Fortune Bonus Bet wager to tie as it is dependent on the cards dealt as the player's hand, not a comparison of cards or hands.

A Joker can only be used to complete a straight or a flush. If it can't be used to complete a straight or flush the joker will be used as an Ace on the Fortune Bonus Bet.

The Fortune Bonus Bet wager remains in action regardless of whether the player's Fortune Pai Gow Poker 1.0 game wager wins, loses, pushes or is placed.

The player-dealer shall pay all qualifying Fortune Bonus Bet wagers and shall collect all Fortune Bonus Bet wagers that did not qualify. Wagers are collected or paid, to the extent that the player-dealer's wager covers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players.

Qualifying Fortune Bonus Bet wagers shall be paid according to the table, as shown below.

Envy Bonus

A player that places a wager of at least \$5 on the Fortune Bonus Bet shall receive an "Envy" button and may qualify for the Envy Bonus payout if another player who placed a Fortune Bonus Bet wager receives a pre-determined and designated qualifying hand, as shown below. Players shall receive one (1) "Envy" button for each Fortune Bonus Bet wager in an amount equal to or greater than \$5.

The Envy Bonus takes into account the first seven (7) cards dealt as a player's hand. In the event that the first seven (7) cards dealt to a player that has placed a Fortune Bonus Bet wager is a pre-determined and designated qualifying hand, as shown below, all players with an "Envy" button shall win. However, a player is not eligible to win an Envy Bonus for their own hand if it qualifies for an Envy Bonus payout. If multiple players have made a seven (7) card qualifying Fortune Bonus Bet and Envy Bonus hand, then all players with an "Envy" button shall win, other than for their own hand. Players shall receive a fixed monetary payout based on the qualifying hand that another player has received and the payable, as shown below. Any other combination of the first seven (7) cards dealt, other than the hands shown below, shall lose.

The Envy Bonus may win regardless of the outcome of the Fortune Pai Gow Poker 1.0 game wager.

Fortune Pai Gow Poker 1.0

The player-dealer shall pay all qualifying Envy Bonuses. Wagers are collected or paid, to the extent that the player-dealer's wager covers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players.

Qualifying Envy Bonus buttons shall be paid according to the table, as shown below.

Tile Values and Rankings

The value of a hand is based on both the numeric and symbolic ranking of the tiles. To find the numeric value of a tile, count the total number of the dots on each tile. Use only the right hand digit value if the total is over 9.

- *Example: A 12-dot tile has a value of 2.*

The color of the dots have no significance and do not change the value of any tile. As noted below, the numerical value of a tile does not represent the actual ranking of each tile.

- *Example: A Gor Tile (4-dots) is higher ranking than a Foo Tile (11-dots).*

Rank 1	Rank 2	Rank 3	Rank 4	Rank 5	Rank 6
 Teen	 Dey	 Yun	 Gor	 Mooy	 Chong
Rank 7	Rank 8	Rank 9	Rank 10	Rank 11	Rank 12
 Bon	 Foo	 Ping	 Tit	 Look	 Chop Gow

Description of Table Used and Total Number of Seated Positions

The game shall be played on a standard Pai Gow table that accommodates up to seven players and a player-dealer position for a total of eight seated positions. Within each betting area for each seated player, there shall be one separate betting space specifically designated for one separate base game wager. Backline betting is permitted on all wagers and players may wager on available betting spaces.

Dealing Procedures and Round of Play

All players post wagers in the betting circles on the table in front of their position before the dice cup is shaken and opened.

1. The house dealer shuffle-washes the tiles and stacks them in rows, with four tiles facing down in each row.
2. Once tiles have been stacked, the player-dealer selects which stack will receive the "Action button". The house dealer identifies the selected hand by placing a button marked "Action" on the stack by pushing it forward.

Pai Gow Tiles

3. To determine the placement of the Action button and first tile stack, the player-dealer shakes a dice cup containing three standard dice.
4. All players must post wagers in the betting circles in front of their position before the dice cup is shaken and opened.
5. The value of the three die indicates which seat the first pile of tiles will be distributed to. The player-dealer's position is always one, nine, and seventeen. Other seats (occupied and unoccupied), in counterclockwise rotation, respectively represent the other numbers.
6. If the total of the three die is nine or seventeen, the player-dealer shall receive the first set of tiles and the player to the left of the player-dealer shall receive the Action button.
7. The house dealer shall distribute the eight sets of tiles in order to each seat, starting with the hand that has the Action button and continuing counterclockwise around the table. All eight sets will be distributed to all seats at the table, regardless of whether a player is seated at each position or a wager has been placed.
 - a. The house dealer will use their right hand to deliver the tiles to seats 1, 2, 3, 4, and use their left hand to deliver to seats 5, 6, 7, and 8. The house dealer will always slide the tiles to ensure no tiles are exposed and use one hand to deliver the tiles.
 - b. The player-dealer's tiles will always be placed in the center of the table, and indicated by placing a "Banker Button" on top of the tiles.
8. Once all of the tiles have been distributed, the house dealer will collect the tiles distributed to seats without a wager and place them in the discard pile. The house dealer will leave these tiles unexposed until the completion of the round of play.
9. Each player shall then set their hands according to the rankings above by arranging the four tile set into a two-tile high hand and a two-tile low hand. The two stacks do not have to be placed in a specific position in relation to each other.
10. Players may have the house dealer set their hands in the "House Way." The player will place their four tiles in one stack in front of their wager. When opened, this hand will be set according to the House Way.
11. Once everyone has placed their tiles in front of their wagers and any House Way hands stacked four tiles high, the house dealer will pass the player-dealer tiles to the player-dealer. Once the tiles have been passed to the player-dealer, any player touching their tiles or wager will forfeit their hand and their wager will be awarded to the player-dealer.
12. After the player-dealer has exposed and looked at their tiles, the house dealer will collect the exposed player-dealer hand and set it into two hands according to the below House Way chart. The player-dealer will have final say as to how the tiles will be set and will be asked for confirmation by the house dealer.
13. Once the player-dealer's hands are set, each player's hand is exposed, in turn, and compared to the player-dealer's hands to determine the winners, losers, or pushes.
 - a. Each two-tile stack will be exposed one tile at a time to avoid any chance of a low hand and a high hand becoming mixed up.

House Way

- Most valuable high hand is a pair.
- Split paired Supreme Pair (Gee Joon) if the third tile has 6-dots and the fourth tile has 4, 5, or 6-dots.
- Split 7-dots tiles if hand has a Teen, Dey and the low hand after the split has a value of 7 or higher.
- Split 8-dot tiles if the low hand after the split has a value of 7 or higher.
- Split 9-dot tiles if the low hand after the split has a value of 9 or higher.
- Split the Teen or Dey tiles if the low hand after the split has a value of 6 or higher, or with tiles containing 9 or 11-dots.

Pai Gow Tiles

- Never split pair with tiles that have 4, 5, 6, 10, or 11 dots.

How Winners are Determined and Paid

All bets are made against the player-dealer. A player wins if both hands rank higher than both hands of the player-dealer. If only one hand ranks higher, it is a tie or a “push.” In case both two-tile combinations are of the same total value (9, 8, 7, etc.), the highest ranking tiles are compared, and the two-tile combination holding the highest ranking individual tile wins. If both of the player’s hands rank lower than the player-dealer’s hands, the player loses to the player-dealer. The player-dealer wins all situations where both hands are identical to the player’s hands. The player-dealer also wins all “zero value” combination ties regardless of the highest tile ranking.

The player-dealer can only receive action on the amount wagered and cannot win or lose more than their original wager. Wagers shall be settled in a clockwise manner around the table, starting with the player with the Action button. Furthermore, all wagers shall be settled from seat to seat. Wagers are collected or paid, to the extent that the player-dealer’s wager covers. Once the player-dealer’s wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players.

Once all hands have been settled and collected, the house dealer will expose all unused tile hands. After they have been exposed to the players, the tiles are to be turned over in preparation for the shuffle-wash.

3. If they wait until the river, when all community cards are out, they may only bet the same amount as their Ante.

This game also features two optional Bonus Bets; Trips Bonus Bet and Bad Beat Bonus Bet.

- Players win the Trips Bonus Bet if their final five-card hand is a Three of a Kind or better.
- Players win the Bad Beat Bonus Bet if their final five-card hand is a Three of a Kind or better and they lose the game; or if the player-dealer has a hand of Three of a Kind or better and is beaten by the player.
