### Games Played:

### Panguingue (PAN):

Panguingue is a rummy-type game played with eight standard 52-card decks with the 8's, 9's, and 10's removed, for a total of 320 cards. No jokers are used. Cards in each suit rank king (high), queen, jack, seven, six, etc. with aces being low. The cards are dealt counterclockwise

Players strive to meld eleven cards in valid sets of three or more cards. There are two kinds of melds: a rope which must be string of cards of matching suits, squares consisting of the ranks 2, 3, 4, 5, 6, 7, Jack or Queen. Squares must be either all cards of different suits or all the same suit. Squares consisting of Kings or Aces qualify regardless of suit. There are no betting rounds in the game.

Each player is dealt 10 cards to meld into sets and sequences with certain cards having special values. Each player, in turn, draws either a card from the top of the remaining deck or from the top of an adjacent discard pile. This sequence of play continues until one player goes out with a total meld of eleven cards, including the card(s) just drawn. Melds (or spread) must be at least three cards, and it may be as many as eleven. The melds are classified as ropes and squares. The rope is any three cards in sequence of the same suit. A square is a set of three cards in the same rank and of different suits or of the same suit. All 3s, 5s and 7s are valle cards (cards of value). Cards of other rank are non-valle. Any three aces or any three kings form a set, regardless of the suit.

#### Example:

Rope: A\*2\*3\*4\*5\* or J\*Q\*K. Ropes must be of matching suits.

Square: 4\*4\*4\*, 7\*7\*7\*, or J\*J\*J\*. Squares consisting of the ranks, 2,3,4,5,6,7, Jack or Queen must be either all cards of different suits or all of the same unit. Squares consisting of Kings or Aces qualify regardless of suit.

Certain melds are called Konditions. Konditions are generally:

1. Any set of valle cards not in the same suit - 1 chip
2. Any set of valle cards, in the same suit - 4 chips in Spades, 2 chips in any other suit
3. Any set of non-valle cards, in the same suit - 2 chips in Spades, 1 chip in any other suit
4. Any sequence of Ace, 2, 3 in the same - 2 chips in Spades, 1 chip in any other suit
5. Any sequence of K, Q, J in the same suit - 2 chips in Spades, 1 chip in any other suit

When a player wins with melding eleven cards. The player collects chips from every other player and also collects all over again for each kondition in their cards. There are no ties in Pan.

## **Texas Hold'em:**

Texas Hold'em is a community card poker game that is played with a standard 52-card deck, no jokers. The game starts to the left of the dealer button. The blind bet(s) are made from the position(s) left of the dealer button and are forced bets which must be made before the cards are dealt. Two cards (hole cards) are dealt to each player, one at a time, face down, in rotation. This is followed by the first round of betting. A player may check, bet, call, raise or fold.

Three cards (the flop) are then dealt face up in the middle of the table as community cards (board cards) and the second round of betting occurs. The fourth community card is dealt face up (the turn), followed by the third round of betting. The final community card (the river) is dealt face up and followed by the fourth (final) round of betting.

At the showdown, each player may use any combination of the hole cards and community cards, or may play the board and use no hole cards to make the highest ranking five-card poker hand. The player with the highest ranking five-card poker hand wins the pot. In the event of a tie, the pot is split equally.

## **Omaha Hi-Low Split (8 or better):**

Omaha Hi-Low Split is a community card poker game that is played with a standard 52-card deck, no jokers. In order for a hand to qualify for the low hand, it must contain an 8 or Better (lower) at showdown. The game starts to the left of the dealer button. The blind bet(s) are made from the position(s) left of the dealer button and are forced bets which must be made before the cards are dealt.

Each player is dealt four cards, one at a time, in turn and face down (hole cards) as their initial hand. A round of betting occurs for players who are continuing to contend for the pot. Three board cards are turned face up (flop) in the middle of the table (community cards). The community cards are available for all players to use. The second round of betting occurs. The fourth community card is turned face up (the turn), followed by a third round of betting. A final community card (the river) is turned up and a fourth and final round of betting occurs. After the final round of betting has been completed, each player may use any two hole cards with three community cards to make the highest five-card poker hand, and any two hole cards with three community cards to make the lowest qualifying five-card poker hand. The lowest qualifying five-card poker hand is Ace, 2, 3, 4, 5. Players must qualify for the low hand with a hand containing an 8 or better (lower). The pot is split equally between the players with the highest ranking hand and lowest qualifying hand. If no player has a low qualifying hand, the player with the highest ranking five-card poker hand wins the entire pot. In the event of a tie, the pot, or portion of the pot, if the tie is for high or low hand only, is split equally.

# AL'S CARDROOM Gaming Activity Review

Before cards are dealt, a "Banker" is established. The bank is offered to each player in turn, moving clockwise around the table. Players have the option of "passing" the bank.

With the banker established, all players place their bets in squares marked 1-10. Five bets are allowed.

"Backline" players may then place bets on squares 2-5 (we allow only four backline bets).

The dealer will then form seven hands each containing seven cards by placing cards one at a time, left to right, until all seven hands are formed.

The banker is then given a dice cup containing three dice. The dice are shaken and an "action number" is determined (for example die of 3-4-5 would make position 12 the action spot). The player to the left of the banker is player #1; the banker is #7 and the action in the above example would begin with player #5.

The hands that have been dealt are numbered #1 through #7 counting left to right.

The banker then indicates which hand is to go to the action, in the absence of a choice by the banker, hand #1 goes to the action button, hand #2 to the next player and so on until all seven hands are delivered to the players.

If any of the seven locations have no bet placed, that hand goes into the muck as a dead hand.

Each player will then arrange his hand so that two cards are placed in "front" and five cards are placed in the "rear". The cards are arranged according to traditional ranking of poker hands. The player must not place the highest hand in the front (2 card poker hand).

After all hands have been placed by the players, the dealer will expose the banker's hand.

Beginning with the "action" location, the player's hand is compared to the banker's hand. For the player to win they must have a better hand than the dealer in both the front and rear poker hand. If the player wins one and loses one the result is a "push" (tie) in which case the player's hand is "killed" and his bet remains in place.

After all the hands have been ranked according to win, lose and push, the dealer starts at the action location deducting from the bank and paying the players or deducting from the bank an amount equal to the player's loss. At any point that the bank is depleted, action stops and the hand is over.

If all bets placed in the #1 betting location are settled without depleting the bank, the dealer then settles bets on backline spots 2 through 5.

Bank rotation is as follows:

The bank rotates in succession, moving clockwise.

## 2. PINEAPPLE

Player #1 and #2 (clockwise from the dealer button) post Blinds.

"Dealer" posts \$3.00 which is taken for the drop. Acting in turn the dealer must pass or play.

Each player is dealt three cards, one at a time, beginning with player #1.

Starting with player #3, all players pass, call, or raise.

Three cards are then placed face up by the dealer (the "flop").

Starting with player #1 all players check, bet, raise or pass.

The dealer turns up a fourth card (the "turn").

Another round of betting ensues.

The dealer turns up a fifth and final card (the "river").

A final round of betting follows.

All active players expose their hands.

The player exhibiting the best high hand in accordance with standard ranking of poker hands will split the pot with the best Lo-Ball hand (five cards eight or under with no pair).

If no hand qualifies as low the player with the best high hand is awarded the pot.

If a low hand is shown, a high hand must have one pair minimum to qualify as high and take half of the pot.

A player "Pans" (wins) the hand when he has played eleven cards on the board, in legal and extended spreads.

He then collects the "Tops" plus 2 chips from each active player for panning the hand and additionally collects pay for what the spreads on the board are worth at the time of ending the hand.

### 3. LO-BALL

Player #1 and #2 (clockwise from the dealer button) post Blinds.

Each player is dealt five cards, one at a time, beginning with player #1.

Starting with player #3, all players bet, call, raise or fold.

Each remaining player, beginning with player #1 will then stand pat or draw one or more cards.

A final round of betting follows.

All active players expose their hands.

The player exhibiting the best five low cards with no pair is awarded the pot.

## OBJECT OF THE GAME

The object of Pure 21.5 Blackjack is for the players and the Player/Dealer to add the numerical value of their cards and:

The games can be played with a minimum of one (1) and a maximum of eight (8) decks.

## **ROUND OF PLAY**

1. Pure 21.5 Blackjack is played on a raised gaming table. The table seats eight players who face the dealer in a 180-degree seating arrangement. The tables are the standard blackjack tables commonly used in the casino industry. The casino dealer stands opposite the players, and in the center of the table. The casino dealer's chip tray is set in front of the dealer. The play starts from the right of the dealer and proceeds in a clockwise fashion.
2. The game uses a 52-card deck with aces through nines (the standard spades, hearts, clubs and diamonds) and 16 bonus cards (four of each "king", "queen", "jack" and "ten"). The game is played with a minimum of a single deck, totaling 52 cards and to a maximum of eight decks totaling 424 cards.
3. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed the collection fee for the players and Player/Dealer will also be displayed. A maximum of three collection rates is allowed in compliance with the California Penal Code.
4. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer will place an amount of money (casino chips) in a betting circle in front of their seat. That money will be used to pay the winners and will set the amount that he/she can collect for the losers. The casino

will place a button in front of the Player/Dealer, which designates that they are taking the "bank position and further designate whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the collection fee in front of his/her betting circle.

5. Players at a table then place their wagers in designated betting circles. The players may place a wager at his/her seat along with other unoccupied betting circles. Each player must pay the posted collection for the wager they placed in any betting circle where they have money or "action".
6. Once the Player/Dealer has posted the amount of money, he/she will wager against the other players, and once the players have placed their wagers, the casino dealer will collect all of the fees. This will always be accomplished before the start of the game in accordance with the California Penal Code. The casino dealer will take the collection fees and drop them into a locked collection box affixed to the gaming table.
7. After the fees have been collected, the dealer will deal the cards to the players and the Player/Dealer. All cards dealt throughout the game are face up, with the exception of the Player/Dealer's second card, which will remain "face down" until all players have acted on their hands. The casino dealer is the only person on the table allowed to touch the cards. The players will signal the dealer with hand gestures that indicate whether they wish to hit or stand. The hand signals will be consistent with the industry standard signals of a sweeping motion towards a player's body, indicating a hit, or a side to side hand motion, indicating the desire to stand. The casino dealer deals the first card to the player seated to the left of the designated Player/Dealer, in a clock-wise manner. Each player will be dealt one card face up with the Player/Dealer receiving the last card. The Player/Dealer's cards will be placed in front of the casino dealer.
8. The casino dealer will deal a second card to the players in the same order noted above. The players are given an opportunity, starting with the player seated to the left of the Player/Dealer, to be dealt additional cards to make the best possible hand. (Rules and procedures for splitting, doubling down, and surrendering will be outlined later)

9. Players must follow the below listed **Charts 1A and 1B** in deciding whether to hit or stand on a particular hand.
10. After all players have acted on their hands and indicated to the casino dealer that they do not want or cannot receive additional cards, the Player/Dealer's down card will be turned up. This down card will determine where the "action button" is placed.
11. The "action button" determines where the action starts and who will be first to be paid for their winning hand or lose their wager. The action button is placed based on the numerical value of the Player/Dealer's down card. A chart (**Diagram #1**) outlining the placement of the action button follows.
12. The Player/Dealer's hand will then be completed according to the rules listed on **Chart 1B**. Once the Player/Dealer's hand is completed, the payoff and/or collection of wagers will begin in the seat designated by the action button and continue in a clockwise manner until all wagers have been acted on.
13. In the event that the Player/Dealer does not have enough money on the table to cover all the wagers on the table, there will be no free collection button, refund, or other conciliatory action given to the affected players by the casino or the Player/Dealer.
14. The Player/Dealer's cards will always be dealt and placed in front of the casino dealer's tray. The placement of the Player/Dealer's cards is standard in all games and is depicted below. See **Diagram #2**

## **DIAGRAM #1**

## DIAGRAM #2

15. After all wagers are settled, the cards are collected and discarded. The bank button is changed from 1st Bank to 2nd Bank and after every two hands, the Player/Dealer position is rotated in a clockwise fashion around the table.
16. The next round of play begins when the casino dealer collects all the cards from the table and places them in the discard tray. The casino dealer will also change the bank button, and if necessary (if the same person has already held the Player/Dealer position twice) rotate the Player/Dealer position clockwise to the next position on the table. If there is no person that intervenes on the Player/Dealer's position, the game will be "broken" or stopped, as required by the California Penal Code.

## **OPTIONS**

The following options are available for individual casinos to cater to the needs of their customers:

### **Pure 21.5 Blackjack Payoff Options**

**3 to 2 Option** – Pure 21.5 Blackjack pays 3 to 2 when dealt to a Player. A Pure 21.5 Blackjack consists of an Ace and a Bonus card on the initial two cards dealt to a Player.

**7 to 5 Option** – Pure 21.5 Blackjack pays 7 to 5 when dealt to a Player. A Pure 21.5 Blackjack consists of an Ace and a Bonus card on the initial two cards dealt to a Player.

**Insurance-** If the Player/Dealer's upcard is an Ace, all Players will have the option to place separate "insurance" wager. They are wagering that the Player/Dealer's undercard is a Bonus card giving the Player/Dealer a Pure 21.5 Blackjack. Winning Insurance wagers pay 2 to 1. Insurance wagers may be equal to no more than 1/2 of a Player's original wager. Insurance may not be offered in casinos where Pure 21.5 Blackjacks pay 6/5 or 7/5.

**Even Money-** In conjunction with offering insurance, when the Player/Dealer's upcard is an Ace, Players that have a Pure 21.5 Blackjack (an Ace and a Bonus Card) may opt to take even money on their wagers before the Player/Dealer's undercard is checked for a Bonus Card. The Player is actually making an insurance wager equal to 1/2 of the original wager. If the Player/Dealer has a Bonus card as the undercard (a Pure 21.5 Blackjack), the Player wins the insurance bet (a wager equal to 1/2 of the original wager that pays 2 to 1) and pushes on the original wager. If the Player/Dealer does not have a Bonus Card as the undercard, the Player will lose the insurance bet and is paid 6 to 5 (for the Pure 21.5 Blackjack) on the original wager. The result in each case is the same as the Player wins an amount equal to the original wager (even money).

**Player/Dealer 888 Option-** If the Player/Dealer's hand is 888 (three eights), all Players who have a total exceeding 21.5 **win**. (The option currently being offered is the same as this one, except all Players exceeding 21.5 **push**).

**Player/Dealer 888 Bonus or Jackpot-** Casinos could offer a Bonus or Jackpot to be paid when the Player/Dealer's hand is 888 (three eights). Each individual casino will decide collection fees, distribution percentages, and funding methods.

**Player/Dealer Same Color 888 Bonus or Jackpot-** Casinos could offer a Bonus or Jackpot to be paid when the Player/Dealer's hand is 888 of one color (three eights of one color). Each individual casino will decide collection fees, distribution percentages, and funding methods.

**Player/Dealer Suited 888 Bonus or Jackpot-** Casinos could offer a Bonus or Jackpot to be paid when the Player/Dealer's hand is a suited 888 (three eights all the same suit). Each individual casino will decide collection fees, distribution percentages, and funding methods.

**Suited 777, Suited 678, and Unsuited 777-** Casinos could offer Bonuses to Players that have hands that consist of three suited sevens, three unsuited sevens, and a six, seven, and eight of the same suit. Each individual casino will decide collection fees, distribution percentages, and funding methods.

**Same color 777 and same color 678-** Casinos could offer Bonuses to Players that have hands that consist of three sevens of the same color and also a six, seven, and eight of the same color. Each individual casino will decide collection fees, distribution percentages, and funding methods.

**Seven Card Charlies-** Casinos could offer Bonuses to Players that have hands that contain seven or more cards that total less than 21.5. Each individual casino will decide collection fees, distribution percentages, and funding methods.

**Bonuses or Jackpots for Two, Three, Four, Five, or more Pure 21.5 Blackjacks in a row-** Casinos could offer Bonuses or Jackpots to Players that have a Pure 21.5 Blackjack on consecutive hands. **3 Card Hold'em** is played with a standard deck of 52 cards on a blackjack-sized table. The game is played by up to six players and a player banker and a house dealer deals the game.

The game also utilizes an action button to determine which player receives first action on their wager when the player-dealer's wager does not cover all action. The third card dealt to the dealer's hand determines the position of the action button. The player-dealer position is always zero (0). The other seats, in clockwise rotation, starting with the player to the left of the player-dealer and continuing in a clockwise manner around the table, respectively represent the other numbers. Wagers shall be settled from player to player in the following order: the 'Ante' wager, then the 'Bet or Fold' wager, then the 'Bet or Check' wager, then the 'Straight or Up' bonus bet, then the 'Pair or Suited' bonus bet. When determining where the action button shall be placed, cards shall hold the following values:

Action Button Card Chart:

Card Dealt	Card Value
Ace	1
2 through 10	Hold their face value
Jack	11
Queen	12
King	13

If the player-dealer's wager covers all action on the table, wagers shall be settled starting with the player to the left of the card room dealer and continuing in a clockwise manner around the table until all wagers have received action. Wagers shall be settled from player to player in the following order: the 'Ante' wager, then the 'Bet or Fold' wager, then the 'Bet or Check' wager, then the 'Straight or Up' bonus bet, then the 'Pair or Suited' bonus bet.

### **OBJECT OF THE GAME**

Each player and the player banker will use 3 out of their 5 cards to make their best three card poker hand. All players try to beat the player banker's three card poker hand.

### **FEE COLLECTION**

The house fees are collected by the house dealer prior to the dealing of any cards.

### **BETTING LIMITS**

The betting limits will be posted at the table.

Additionally, back-line betting is only permitted on the Straight or Up and/or Pair or Suited wagers. Back-line bettors shall not be permitted to place a base game wager and therefore are not required to place a base game wager in order to place a back-line bet on the Straight or Up and/or Pair or Suited bonus bets.

## A ROUND OF PLAY

- 1) Each player makes a compulsory Ante bet and places the appropriate amount of the collection fee. (Players may only play one hand.) The Pair Or Suited and Straight Or Up side bets are optional (see below) but can be made only if an Ante bet is made. The Ante and the two side bets need not be equal as long as they are within the table limits.
- 2) All players and the player banker get two hole cards face down. The player cards will remain face down until the player banker receives his hand.
- 3) Three communal cards known as the “flop” in Hold’em are dealt on the board with the first card revealed.
- 4) After looking at his hand and the open communal card, the player can (a) fold and forfeit the Ante, or (b) match the Ante with an additional equal bet. If the player chooses to fold after seeing his first two cards, the Ante bet loses but both the Pair Or Suited and Straight Or Up side bets, if made, remain in action.
- 5) The dealer reveals the second communal card. Now each player can either check or match the Ante with an additional bet.
- 6) The dealer reveals the third communal card and the player banker’s two hole cards. Now everyone has 5 cards – his 2 hole cards plus the 3 communal cards. All players and the player banker use any 3 of the 5 cards, including the board, to make their best three card poker hand.
- 7) Each player hand is compared with the player banker’s hand. Whoever has the higher rank wins. The player banker must have a pair of 4s or better, or else the Ante is not paid if the player wins.

### Pair Or Suited

This side bet is optional. Backline betting is permitted for this wager. If the player’s first two cards make a pair or are suited, it will be paid according to the pay tables below:

(All payouts are "to 1.")

Player 2 card Hand	A1
AK Suited	30
AA	20
KK	10
One Pair	4
Two Suited Cards	1

### Straight Or Up

This side bet is optional. Backline betting is permitted for this wager. If the player's best 3 card poker hand is a straight or better, it will be paid according to the pay tables below:

Hand Type	B1
AKQ Suited plus a Pair*	100
AKQ Suited	40
Straight Flush	10
Three of a Kind	9
Straight	1

\* All five cards must be used to win "AKQ suited plus a pair." Example: A♣K♣Q♣5♥5♦.

### NOTES

- a) There are no two pairs, 4 of a kinds, nor full houses. Any 4 of a kind and any full house should be paid the same as a 3 of a kind.
- b) When a hand can have more than one rank, only the highest rank applies. For example, if a hand has both a 3 of a kind and a straight flush, such as 8♥8♦8♣7♣9♣, then it is a straight flush because a straight flush outranks a three of a kind. A hand of 8♥8♦8♣7♥9♣ is a 3 of a kind but not a straight because a three of a kind outranks a straight.
- c) The outcome of the Ante bet has no bearing on the two side bets.

### DEALING THE GAME

The game may be dealt by hand or by an automatic shuffler.

#### Deal by Hand

The dealer will shuffle the deck using the house procedure for single deck shuffling. Upon completion of the shuffling process, the dealer will cut the deck in half using a one-handed "poker" cut before dealing to the players. The cut must be at least ten cards away from either the top or the bottom of the deck.

### Automatic Shuffler

When using a shuffler, the casino will be permitted to use a second deck of cards to play the game provided that:

- a) The backs of the cards are of different colors.
- b) The shuffling machine is shuffling one deck while the other deck is either being dealt or used to play the game.
- c) Both decks are continuously alternated in and out of play, with each deck being used for every other round of play.

If the shuffler can be programmed to output two cards at a time, the dealer will pick up each two card hand from the shuffler and hand it to each player one at a time clockwise. If the shuffler can't output two cards at a time, the dealer must pick up the entire deck after the shuffle and deal according to the **Deal by Hand** rules above.

### Dealing

The dealer deals each player and the player banker two cards face down beginning with the player to the left of the dealer. The cards are dealt one at a time and clockwise. The dealer then deals a first communal card face up to the card box to the dealer's left. The dealer then burns a card and deals the second and third communal cards to the remaining two card boxes in the center of the table from left to right:

Now the dealer will pass out the two face-down cards to each player and the player banker.

### **First Betting Round**

Now the players look at their cards. They may fold their hand or bet:

**Fold** - If a player folds, he must place his cards face down above his Ante bet.

**Bet** - If a player wishes to stay in the game, he must place a bet equal to the Ante on the betting circle labeled "Bet or Fold" beneath the Ante bet.

After all players have made their decisions, the dealer will pick up the Ante bets and cards from those players who folded. However, if the player who folded has a bet on any of the two side bet circles, the dealer should pick up the player's cards and place them in front of his side bet(s) because the side bet(s) remain in action:

### Final Betting Round

After the dealer has picked up all bets and cards from those who folded, the dealer will turn up the second communal card:

Dealer hand area

Now the player may either check or place another bet equal to the Ante on the betting circle labeled "Bet or Check." No folding is allowed at this point. After all players have made their decisions, they must place their cards face down as follows:

After all players have made their decisions, the dealer turns up the last communal card and the player banker's two cards.

### ARRANGING THE PLAYER BANKER'S HAND

The dealer will pick 3 of the 5 cards to make the player banker's best 3-card poker hand. Depending on the player banker's two hole cards, the dealer must place the cards as follows. The 3 cards the player banker uses should be placed as close to one another as possible:

- a) If the player banker will use both his hole cards, the dealer must place the two cards below the one communal card he picks to use:

- 1) When using the right communal card (A-high flush):

- 2) When using the left communal card (8-high straight):

Chip Tray

3) When using the center communal card (5-high straight flush):

Chip Tray

b) If the player banker will use just one of his hole cards, the dealer must place the card he won't use perpendicular to the card he will use and place the card he will use below the two communal cards he picks as follows:

1) When using the right two communal cards (3-high straight):

Chip Tray

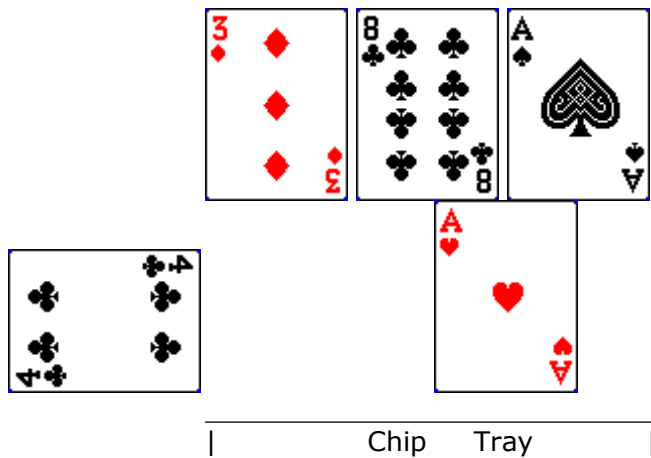

2) When using the left two communal cards (3 of a kind):

3) When the left and right communal cards will be picked, the dealer must SWAP the center communal card with the left or right communal card before placing the player banker's one hole card below them. Assume the player banker has A♥ and 4♣ to make a pair of Aces with the following 3 communal cards:

The dealer must swap 8♣ and 3♦ and then place A♥ below A♠ and 8♣.

This is the only time the dealer must swap the communal cards.

c) If the player banker won't use his hole cards at all, the dealer must place the two hole cards as follows:

(Note that everyone including the player banker can use the board if the hand on the board is their best 3-card poker hand.) After the dealer has properly arranged the player banker's hand, starting with the first player to his right, he turns over each player's hand to determine the hand rank. The dealer should place the player's hand in front of his Ante bet with one card partially superimposing the other as in blackjack. The top card should only cover a corner of the bottom card such that the rank and the suit of the bottom card can be seen easily.

## SETTLING THE BETS

### Ante/Bets

Only the best 3 out of the 5 cards, including using all 3 cards on the board, are selected to make a 3-card poker hand. The hand ranking in descending order is as follows:

- Straight flush
- 3 of a kind
- Straight (A-2-3 is the lowest straight.)
- Flush
- One pair

The hand is settled as follows:

If the player banker beats the player, the Ante and Bets lose.

If the player beats the player banker, the outcome depends on whether the player banker has at least a pair of fours:

- If the player banker's hand is less than a pair of fours, all Bets are paid 1 to 1 and the Ante pushes.
- If the player banker has a pair of fours or better, the Ante and all Bets are paid 1 to 1.

Ties are pushes.

When paying the player's Ante and Bets, always place the winning chips to the left of the betting circles. If the Ante is not paid, then do not place any chips next to the Ante bet. The following payment example assumes the player had a \$25 bet on all his betting circles:

### Side Bets

Check the player hand against the appropriate side bet pay table to see if it qualifies for a payoff. When paying the side bets, simply place the winning chips in front of each side bet.

### PUTTING AWAY THE CARDS

Each player's hand should be picked up and put in the discard rack as soon as his hand is settled. When all bets have been settled, the dealer will pick up the player banker's cards and use it to scoop up the three communal cards; these five cards are then put back, face down, in the discard rack.

### IRREGULARITIES

- a) We will attempt to deal with what we believe are reasonable errors to expect and offer solutions. It needs to also be understood that in all decisions, the floor supervisor's ruling is final.
- b) If any card is found face up in the shuffler, or the deck, while the cards are being dealt, all hands will be voided and the cards will be reshuffled.
- c) If any player, or the banker, is dealt an incorrect number of cards, all hands will be voided and the cards will be reshuffled.
- d) If an automated shuffler is being used and the device malfunctions, jams or fails to deal the appropriate number of cards, the round of play will be voided and the cards will be removed from the device, checked by a casino supervisor, and reshuffled.
- e) Other errors that may occur in the card game:
  - 1) **Card on the Floor:**  
If a player drops a card from their hand, that card will still be in play. A floor supervisor should be called to pick up the card.

- 2) **Exposed Card in the player banker's Hand:**

If a card is exposed in player banker's hand, the round will be declared a misdeal.

3) **Exposed Communal Cards:**

If the 2<sup>nd</sup> or the 3rd communal card is exposed before its turn to be exposed, the round will be declared a misdeal.

4) **If a Player is not Dealt a Hand: (missed by the dealer)**

All players must be seated at the table in order to receive a hand. If the player is seated, has placed a bet, and is missed by the dealer, the hand will be declared a misdeal and all hands will be voided.

**GLOSSARY**

Communal Cards – the 3 cards dealt to the center that can be used by all players and banker

## **Dealing procedures:**

- ❖ The casino dealer deals the cards into seven piles of seven cards face down. The Dealer deals seven piles of cards of seven each, in turn, in rotation in the middle of the table. The first card will be placed to the dealer's left and then additional cards will be dealt to the right until seven cards lay in front of the dealer. The dealer will then deal another seven cards, starting with the card farthest to the dealer's right. Cards shall be dealt in this back and forth manner until each pile has seven cards. The Player-dealer selects which pile will be distributed to the first Player who is randomly selected. The Dealer identifies the hand by placing a "button" marked "ACTION" on this pile.
- ❖ When dealing the seven (7) piles of seven (7) cards using an automatic shuffler, the automatic shuffler deals seven (7) piles of (7) seven cards each. The action button, which determines the first player to receive first action from the player-dealer, is placed on the first pile dealt by the automatic shuffler. Once the action button position is determined, the card room dealer shall distribute the seven (7) piles of cards, starting with the pile that has the action button and continuing clockwise. All seven (7) piles of cards shall be distributed to all seats at the table, regardless of whether a player is seated at each position or a wager has been placed.
- ❖ After individual wagers are placed in the circle in front of the players, the player-dealer will be offered the dice cup, which contains three dice, to shake. The Casino dealer opens the dice cup, and the number of dots facing up on the dice determines the seated player who will receive the first set of cards (chosen by the player-dealer in the previous step) and the action button. If the dots on the dice equal 1, 8 or 15, the player-dealer receives cards first, and the player sitting left of the player-dealer receives the action button.
- ❖ Each pile of seven cards is distributed to each seat at the table, starting with the pile of cards that received the action button to the player that received the action position. The remaining piles, starting with the pile to the right of the action pile from the dealer position, shall be distributed to the remainder of the seats in a clockwise manner. The Dealer collects cards distributed to seats without a wager and places them in the discard pile.

Players and the player-dealer each receive two cards. They combine them with five community cards to make their best five-card hand.

Ultimate Texas Hold'em lets players bet aggressively. The earlier they bet, the more they can risk and win. If players bet pre-flop, they may risk 3x or 4x their ante. If they bet on the flop, they may bet 2x their ante. If they wait until the river, when all community cards are out, they may only bet 1x their ante.

This game also features an optional bet, the Trips bonus. Players win the Trips bonus if their final five-card hand is three of a kind or higher. Odds will be printed on layout.

## **Description of Table Used and Total Number of Seated Positions**

The game shall be played on either a standard blackjack table that accommodates up to seven players and a player-dealer position for a total of eight seated positions or a standard baccarat table that accommodates up to thirteen players and a player-dealer position for a total of fourteen seated positions. Within each betting area for each seated player, there shall be five separate betting spaces specifically designated for five separate wagers; the Player line, the Banker line, the Tie Bet, the Player Dragon Bonus Bet, and the Banker Dragon Bonus Bet. Each betting space at the table has a fixed amount for wagering limits defining the minimum and maximum amounts that may be wagered. Players must bet at least the table minimum. Back-line betting is not permitted on any wagers.

## **Method used to Determine Action and Distribution of Cards**

The game utilizes an action button to determine which player receives first action on their wager. The second card dealt to the banker hand determines the position of the action button. The player-dealer position is not counted when determining where the action button shall be placed. The other seats, in clockwise rotation, starting with the player to the left of the house dealer and continuing left to right, respectively represent the numbers of the second card dealt to the banker hand. When determining where the action button will be placed, cards will hold the following values: Ace is one, 2 through 9 have their face value, jack is eleven, queen is twelve, and king is thirteen.

# Commission-Free Baccarat Dragon Bonus

Wagers will be settled in the following order from player to player: all Player line wagers, then all Banker line wagers, then all Tie Bet wagers, then all Player Dragon Bonus Bet wagers, then all Banker Dragon Bonus Bet wagers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players.

## Dealing Procedures and Round of Play

At the start of a game, a player is offered the player-dealer position. Once a player-dealer position has been established for that game, the house dealer shall wait for each player to make their wager in accordance with the table limits.

Each player then has the following option(s) when placing their wager(s):

- The Player line which pays 1 to 1;
- The Banker line which pays 1 to 1 on all wins except 6, which shall pay 1 to 2;
- Place a wager on the Tie Bet which pays 9 to 1;
- If a player placed a wager on the player line or the banker line, that player may place a wager on the Player Dragon Bonus Bet and/or the Banker Dragon Bonus Bet, which pays according to the appropriate pay table below.

Once all wagers are placed, the house dealer deals one card to the right and one card to the left, one by one in rotation, until each hand has a total of two cards each. All cards are dealt face-up. The hand to the left of the house dealer is a community hand that belongs to those that placed a wager on the Banker line. The hand to the right of the house dealer is a community hand that belongs to those that placed a wager on the Player line. The player's hand is resolved first and then the banker's hand is resolved. The hand that is closest to nine wins. After the house dealer delivers the first two cards to both the Player line and Banker line, the following Baccarat rules are followed.

- The player's hand must stand when the hand is valued at 6 through 9, and must hit when the hand is valued at 5 or less.
- If the player's hand stands, then the dealer hand hits on a total of 5 or less.
- If the player's hand hits for a complete hand then the banker's hand hits using the following rules:
  - If the banker's hand total is 3, then the banker's hand is dealt a third card unless the third card dealt to the player's hand was an 8.
  - If the banker's hand total is 4, then the banker's hand is dealt a third card unless the third card dealt to the player's hand was a 0, 1, 8, or 9.
  - If the banker's hand total is 5, then the banker's hand is dealt a third card if the third card dealt to the player's hand was 4, 5, 6, or 7.
  - If the banker's hand total is 6, then the banker's hand is dealt a third card if the third card dealt to the player's hand was a 6 or 7.

The following chart shows when the banker hits (H) or stands (S) according to the rules above:

Banker's Score	Player's Third Card									
	0	1	2	3	4	5	6	7	8	9

In the event that the player's hand and the banker's hand are different, the Tie Bet wager loses.

- Regardless of what hand a player wagered on, a player may wager on the Player Dragon Bonus Bet, the Banker Dragon Bonus Bet, or both.
- The wager placed on the Player Dragon Bonus Bet and the Banker Dragon Bonus Bet must be within the posted table limits.
- The Player Dragon Bonus Bet wager takes into account the final value of the player's hand and the final value of the banker's hand. If a player wagers on the Player Dragon Bonus Bet and the player's hand beats the banker's hand by a spread of four points or greater, the Player Dragon Bonus Bet wager wins. Additionally, if the player's hand is a natural and the hand wins, the Player Dragon Bonus Bet wager shall win.   - d. If the player's hand and the player-dealer's hand are equal in rank and value, the hand is considered a tie and the Ante and Play wagers shall push and be returned to the player.
6. The house dealer shall then reveal the three card hand of each active player, starting with the player to the left of the player-dealer position.
7. All cards collected by the house dealer shall be picked up in order and placed in the discard rack in such a way that they can be readily arranged to reconstruct each hand in the event of a question or dispute.
8. The action on payouts will always begin with the player to the left of the player-dealer position and continue clockwise. Wagers will be settled in the following order from player to player: the Ante wager, then the Play wager, then the Pair Plus wager (if placed), and then the 6 Card Bonus wager (if placed). Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players. The game utilizes an action button to determine which player receives first action on their wager. The player-dealer's third card, which is dealt face-up, determines the position of the action button. The player-dealer's position is not counted when determining where the action button shall be placed. The other seats, in clockwise rotation, starting with the player to the left of the house dealer and continuing left to right, respectively represent the numbers of the player-dealer's face down card. When determining where the action button will be placed, cards will hold the following values: Ace is one, 2 through 9 have their face value, jack is eleven, queen is twelve, and king is thirteen.
9. Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house shall not participate as the player-dealer. The house shall not take a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.

10. The player-dealer position shall be offered systematically and continuously in a clockwise manner around the table after every two hands. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

The Pair Plus is an optional bonus bet for Three Card Poker. The rules are as follows:

1. A player shall only place a Pair Plus wager if he/she has also placed an Ante wager prior to the initial deal.

3. See the collection rate schedule for restrictions on the amount that may be wagered on the Pair Plus Bonus Bet and any collection fees that may be taken.
4. The Pair Plus only considers the three cards each player receives.
5. If the player's hand qualifies for payouts, the player is paid according to the posted pay below by the player-dealer.
6. If the player's hand does not qualify for payouts, the player-dealer collects the Pair Plus wager.
7. The player-dealer will pay all winning Pair Plus wagers and will collect all losing Pair Plus wagers.
8. The Pair Plus wager may win or lose regardless of the outcome of the base game wager. However, the Pair Plus wager shall be forfeited if the player folds their hand and does not place a Play wager.
9. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players.

3. See the collection rate schedule for restrictions on the amount that may be wagered on the 6 Card Bonus Bet and any collection fees that may be taken.
4. The 6 Card Bonus wager considers the three cards dealt to the player's hand and the three cards dealt to the player-dealer's hand. A player then uses any of those six cards, regardless of the number of cards used from their hand or the player-dealer's hand, to make the best possible five card poker hand.

5. If the player's hand qualifies for payouts, the player is paid according to the posted pay below by the player-dealer.
6. If the player's hand does not qualify for payouts, the player-dealer collects the 6 Card Bonus wager.

## **Description of Table Used and Total Number of Seated Positions**

The game shall be played on a standard poker table which shall accommodate up to seven seated positions for patrons. Each seated position at the table shall have the same minimum and maximum wagering limits during each betting round, as specified by table limits.

## **Action and Distribution of Cards**

The game also utilizes a flat disk called a "dealer button" to visually designate which player is in the dealer position (in theory) for that hand. The dealer button rotates clockwise after each hand. The dealer button is the last to receive cards on the initial deal, but does not determine where action begins. The player with the highest card clockwise of the dealer button will make a mandatory opening bet (the "bring in"). When two cards of equal value are present, the first player to receive their card will open the betting. (When the joker is dealt face up on the initial round it will be considered an ace for the purpose of determining the bring in.) The opening bettor has the option of opening at either the lower or upper limit in limit games, or opening for at least the minimum in no-limit games.

## **Dealing Procedures and Round of Play**

When first opening a game, all players are dealt one card. The player with the highest ranked card, by suit (spades, hearts, diamonds, clubs), shall receive the dealer button. Once the dealer button has been established, the cards are collected and each player shall be required to place an "ante." Antes are used to initiate action and are posted before players receive any cards. All antes shall be placed in the center of the table, which is known as "the pot." Once the antes have been posted, the card room dealer shall deal one card face up to each player, starting with the first player clockwise of the dealer button and continuing around the table until all players have one face up card. The card room dealer shall then deal one face down to each player, starting with the player clockwise of the dealer button and continuing around the table until all players have a total of two cards; one face up and one face down. Once the initial two cards have been distributed to each player, the first round of betting will occur. The player that has been dealt the highest face up card, clockwise of the dealer button, according to card rank and suit, shall be required to place a bet equal to the amount of the lower table limit,

## Mexican Poker

referred to as the “bring in.” Players are then given the following options, starting with the player clockwise of the player that placed the bring in, and then continuing around the table:

- Call the bring in by placing a wager equal to the bring in;
- Raise the pot by placing a wager equal to the bring in as well as an amount equal to the lower table limit. In no limit games the amount of the raise must be equal to or larger than the amount of the bring in and may be up to the entire amount of chips that that player has on the table. If a player raises the pot, all other players shall be required to call the raise, re-raise the pot by an amount equal to the lower table limit, or fold their hand. In no limit games the player must re-raise the pot for an amount equal to or greater than the amount of the previous raise. There is a maximum of three raises per round of betting unless there are only two active players in which case there is no limit to the number of raises. In no limit games there is no limit to the number of raises, regardless of the number of players remaining in the pot. When a raise or re-raise occurs, checking is not permitted;
- Fold their hand, which shall be collected by the card room dealer.

After all players have acted in turn and either called all bets or folded their hand, the card room dealer shall move all player bets into the pot. Players are now given the opportunity to expose their down card, beginning with the player clockwise from the dealer button. If a player chooses to expose their down card, their next card will be dealt face down. If they do not choose to expose their down card, their next card will be dealt face up. After all players have acted on their hands in this manner, the card room dealer shall then take the top card of the deck and place it in the discard pile without exposing it. The card room dealer shall then deal one card face up or face down, depending on the player’s decision to expose their already dealt face down card, to each player, starting with the player to the left of the “dealer button” and continuing clockwise around the table until all players have a total of three cards; two face up cards and one face down card. The face up cards are not community cards and are only available to the player whose hand they belong. Once each player has been dealt their third card, the second round of betting will occur. All active players, which are players that called all wagers and did not fold their hand, shall be given the following options, starting with the player that has the highest ranked face up card(s):

- Fold their hand according to the rules and guidelines used in the previous betting round;
- Check their hand according to the rules and guidelines used in the previous betting round;
- Raise the pot according to the rules and guidelines used in the previous betting round;
- Call a raise according to the rules and guidelines used in the previous betting round.

After all players have acted in turn and either called all bets or folded their hand, the card room dealer shall move all player bets into the pot. Players are now given the opportunity to expose their down card. If a player chooses to expose their down card, the next card will be dealt face down. If they do not choose to expose their down card, the next card will be dealt face up. The card room dealer shall then take the top card of the deck and place it in the discard pile without exposing it. The card room dealer shall then deal one card face up or face down,

## Mexican Poker

depending on the player's decision to expose their already dealt face down card, to each player, starting with the player clockwise of the dealer button and continuing around the table until all players have a total of four cards; three face up cards and one face down card. The face up cards are not community cards and are only available to the player whose hand they belong. Once each player has been dealt their fourth card, the third round of betting will occur. All active players shall be given the following options, starting with the player that has the highest ranked face up cards:

- Fold their hand according to the rules and guidelines used in the previous betting round;
- Check their hand according to the rules and guidelines used in the previous betting round;
- Raise the pot according to the rules and guidelines used in the previous betting round;
- Call a raise according to the rules and guidelines used in the previous betting round.

After all players have acted in turn and either called all bets or folded their hand, the card room dealer shall move all player bets into the pot. Players are now given the opportunity to expose their down card. If a player chooses to expose their down card, the next card will be dealt face down. If they do not choose to expose their down card, the next card will be dealt face up. The card room dealer shall then take the top card of the deck and place it in the discard pile without exposing it. The card room dealer shall then deal one card face up or face down, depending on the player's decision to expose their already dealt face down card, to each player, starting with the player clockwise of the dealer button and continuing around the table until all players have a total of five cards; four face up cards and one face down card. The face up cards are not community cards and are only available to the player whose hand they belong. Once each player has been dealt their fifth card, which is the final card dealt to each active player, the fourth and final round of betting will occur. All active players shall be given the following options, starting with the player that has the highest ranked face up cards:

- Fold their hand according to the rules and guidelines used in the previous betting round;
- Check their hand according to the rules and guidelines used in the previous betting round;
- Raise the pot according to the rules and guidelines used in the previous betting round;
- Call a raise according to the rules and guidelines used in the previous betting round.

### **How The Pot Is Awarded**

After the fourth and final round of betting has been completed, the house dealer shall move all player bets into the pot. All active players shall then enter into a showdown with each other and compare their hands. The following shall apply for determining which player wins the pot:

- The pot shall be awarded to the player with the highest ranking five-card poker hand, according to the hand and card rankings shown above. All other players shall lose;

## Mexican Poker

- In the event that more than one player has the highest ranking hand, the pot shall be split equally among the winners. In the instance that there are an odd number of chips, the odd chips shall be awarded to the player beginning clockwise of the dealer button. For the purpose of determining a winner, suit will not be used to determine the ranking of tied hands.

### Collection Rate Schedule

For **schedule options 1 through 10**, the collection fee shall be taken by the house dealer from the pot after the first betting round is complete. The Regular Table Fee shall be taken from the pot when the first up card has been dealt to each player. The Designated Fee-Late shall be taken from the pot when the third up card has been dealt to each player. The collection fees shall be pre-determined and conspicuously posted on each table prior to any cards being dealt or a round of play commencing. Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed below, shall be used at a table at any one time. Rates may not be calculated as a fraction or percentage of wagers made or winnings earned. Flat fees on wagers may be assessed at different collection rates; however, no more than five collection rates may be established per table. ## PURE SPANISH 21.5 RULES

### ROUND OF PLAY

1. Pure Spanish 21.5 is played on a raised gaming table. The table seats up to eight players who face the house dealer in a 180-degree seating arrangement. The tables are the standard blackjack tables commonly used in the casino industry. The house dealer stands opposite the players, and in the center of the table. The house dealer's chip tray is set in front of the dealer.
2. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed. The collection fee for the players and player-dealer shall also be displayed. A maximum of five collection rates is allowed in compliance with the California Penal Code.
3. A standard round of play begins when a player-dealer is designated. The player-dealer will place a wager in a betting circle in front of their seat. That wager will be used to pay the winners and will set the amount that he/she can collect for the losers. The casino will place a button in front of the player-dealer, which designates that they are taking the "bank" position and further designates whether it is the first or second turn for the player-dealer in the banking position. The player-dealer will place the appropriate collection fee in front of his/her betting circle.
4. Players at a table then place their wagers in designated betting circles. The players may place a wager at his/her seat along with other unoccupied betting circles. Each player must pay the appropriate collection fee based on the posted schedule for the cardroom. Prior to the start of play the house dealer will take collection fees and drop them into a locked collection box affixed to the gaming table.
5. After the fees have been collected, the house dealer will deal the cards to the players and the player-dealer. All cards dealt throughout the game are face up, with the exception of the player-dealer's second card, which will remain face-down until all players have acted on their hands. The house dealer is the only person on the table allowed to touch the cards. The players will signal the dealer with hand gestures that indicate whether they wish to hit or stand. The hand signals will be consistent with the industry standard signals of a sweeping motion towards a player's body, indicating a hit, or a side to side hand motion, indicating the desire to stand. The house dealer deals the first card to the player seated to the left of the player-dealer, and continues in a clock-wise manner. Each player will be dealt one card face up with the player-dealer receiving the last card. The player-dealer's cards will be placed in front of the house dealer.
6. The house dealer will deal a second card to the players in the same order noted above and the last card will go to the player-dealer and will be dealt face down. The players are given an opportunity, starting with the player seated to the left of the player-dealer, to be dealt additional cards to make the best possible hand.

## Turlock Poker Room PURE SPANISH 21.5 RULES

7. Players must follow the below listed **Chart 1A** in deciding whether to hit or stand on a particular hand.
8. After all players have acted on their hands and indicated to the house dealer that they do not want or cannot receive additional cards, the player-dealer's down card will be turned up. This down card will determine where the "action button" is placed.
9. The game utilizes an action button to determine which player receives first action on their wager. The player-dealer's second card, which is dealt face-down, determines the position of the action button. The player-dealer position is not counted when determining where the action button shall be placed. The other seats, in clockwise rotation, starting with the player to the left of the house dealer and continuing left to right, respectively represent the numbers of the player-dealer's face down card. When determining where the action button will be placed, cards will hold the following values: Ace is one, 2 through 9 have their face value, jack is eleven, queen is twelve, and king is thirteen.
10. The player-dealer's hand will then be completed according to the rules listed on **Chart 1B**. Once the player-dealer's hand is completed, the payoff and/or collection of wagers will begin in the seat designated by the action button and continue in a clockwise manner until all wagers have been acted on.
11. Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house shall not participate as the player-dealer. The house shall not take a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.
12. The player-dealer's cards will always be dealt and placed in front of the house dealer's tray. The placement of the player-dealer's cards is standard in all games and is depicted below. See **Diagram #1**
13. The next round of play begins when the house dealer collects all the cards from the table and places them in the discard tray. The player-dealer position shall be offered systematically and continuously in a clockwise manner around the table after every two hands. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

## PURE SPANISH 21.5 RULES

### GAME RULES

1. A Pure Spanish 21.5 (an ace and a King, Queen, or Jack Bonus card) is the best possible hand. If the player and the player-dealer's hand are both Pure Spanish 21.5 the player wins.
2. If the player-dealer does not have a Pure Spanish 21.5, the players will be given the option to draw to improve their hands, in accordance with Chart 1A above. The player-dealer's face-down card will be checked by the house dealer, for a Pure Spanish 21.5, when the player-dealer's face-up card is an ace or King, Queen, or Jack Bonus Card. This will happen prior to any additional cards being given to players. If the player-dealer has Pure Spanish 21.5, no additional action will take place and all players' hands that do not have a Pure Spanish 21.5 will lose.
3. After all players have been given a chance to act on their hands, the player-dealer's hand will be completed in accordance with Chart 1B.
4. If a player's total is less than a Pure Spanish 21.5 and the player-dealer's total is more than a Pure Spanish 21.5, the player wins the hand.
5. If a player's total is more than a Pure Spanish 21.5 and the player-dealer's total is less than a Pure Spanish 21.5, the player loses the hand.
6. If a player and the player-dealer have the same total and it is less than a Pure Spanish 21.5, the hand is a push or tie. No action is taken on the wager.
7. If a player's total and the player-dealer's total are less than a Pure Spanish 21.5, the hand closest to a "Pure 21.5 Blackjack" will win.
8. If the player and the player-dealer's total are both 21 and neither hand is a Pure 21.5 Spanish Blackjack hand, the player wins the hand.
9. If a player's total and the player-dealer's total are more than a Pure Spanish 21.5, the following will apply:
  - a. If the player-dealer's hand is 888 (three eights) all players whose total is more than 21.5 push.
  - b. If the player-dealer's hand is not 888 (three eights) all players whose total is more than 21.5 lose.
10. All collection rates and wagering limits will be posted at the table. They will not be based on any percentage.

## PURE SPANISH 21.5 RULES

11. Backline betting is permitted on all wagers.
12. Third Party Providers of Proposition Player Services, as defined in Section 19984 of the California Business and Professions Code, are permitted to play.

### **DOUBLE-DOWN, RESCUE, DOUBLE-DOUBLE DOWN, SPLIT, AND SURRENDER**

1. Players can double-down on the first two cards dealt to them. The player must place a second wager which may be equal to or less than the player's original wager. The player will only receive one additional card, regardless of the total.
2. After doubling, if a player is dissatisfied with his/her non-busted hand, he/she may "rescue" (take back) the last doubled portion of the bet and forfeit the remainder of the wager. Their play for the hand will then cease.
3. If the player-dealer hits on a soft 17, the casino may allow an option known as "double-double down." If the casino allows the double-double down option, once a player elects to double and receives a double card, the player then has the option to double-double down (double his total wager again), rescue the last doubled portion of the bet, or stand. A player may double the total wager up to three times, once via double down and twice via double-double down, creating a maximum wager up to 8 times the original wager. After doubling a third time and receiving a double card, a player only has the option to stand or rescue. When a player "rescue" (take back) the last doubled portion of the bet and forfeit the remainder of the wager. Their play for the hand will then cease.
  - a. Important: The "double-double down" option is not available to the player when the player-dealer stands on all totals of 17. Doubling for less is only allowed if the double-double down option is not allowed. In other words, when the double-double down option is allowed there is no doubling for less, however, the double-double down wager amount would be capped at the maximum wager allowed. If the last double-double down wager made is capped, the "last doubled portion of the bet" would be the maximum wager allowed. If a player doubles for less, the last doubled portion of the bet would be that lesser amount.
4. Players can split any pair or two cards of the equal value, including aces and Bonus cards. The player must place a second wager equal to the original wager. The player may draw as many cards as desired per split card. There is no splitting for less.
5. A maximum of three splits is allowed per hand, giving a player up to 4 hands. Doubling-down is permitted after splitting.

## Turlock Poker Room PURE SPANISH 21.5 RULES

6. Players can surrender after the first two cards are dealt to them. If they choose to surrender, half of their wager will be forfeited. The player must indicate their desire to surrender before the player-dealer's down card is exposed. Their play for the hand will then cease.
7. Late surrender option:
  - a. Players will have to option to surrender after the dealer has checked for Pure 21.5 Blackjack. If the player-dealer has Pure 21.5 Blackjack, the hand is over there will be no draw; the player will not have the option to surrender.
  - b. If the player-dealer does not have Pure 21.5 Blackjack the player will have the option on their original first two cards dealt to them to surrender, whereas half of their wager will be forfeited. The player must indicate their desire to surrender before the player-dealer's down card is exposed. Their play for the hand will then cease.
8. The casino will take no extra collection fee on double downs or splits from the player or player-dealer.
9. All payoffs are to the extent that the player-dealer's money covers the action on the table. A player-dealer cannot win or lose more than the entire amount of money placed on the table before the start of the hand.

### **Match the Dealer Up-Card Bonus Bet**

1. In addition to the regular base game wager, a Match the Dealer Up-Card bonus wager shall be offered.
2. A Match the Dealer-Up Card bonus wager is a wager that one or both of a player's original two cards of the hand will exactly match the dealer's up-card in rank.
3. In order to play the Match the Dealer-Up Card bonus wager, the player must make a regular base game wager.

There are two payoff amounts for each respective wager, a suited rank match and an unsuited rank match. All payoffs are shown in the following Match the Dealer Up-Card Bonus Pay Tables.

### Wagering Limits and Collection Fees

For **schedule options 1 through 21**, a collection fee shall be taken per hand from the player in the player-dealer position based on the total monetary value of all game wagers and bonus bet wagers that are placed by players prior to cards being dealt, referred to as total table action. The total table action does not count the player-dealer's wager or any additional wagers placed by players after cards are dealt, such as when players double-down, split cards, place an insurance wager, or when a hand is surrendered. There will be no additional collection fee required from a player when placing a game wager or bonus wager. The bonus bet may be less than, more than, or equal to the game wager, but must be within the table limits. The collection fees shall be collected from the player-dealer and dropped by the house dealer after the house dealer has dealt each player their initial two card hand. The collection fees shall be pre-determined prior to any cards being dealt or a round of play commencing. Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed above, shall be used at a table at any one time. Rates may not be calculated as a fraction or percentage of wagers made or winnings earned. Flat fees on wagers may be assessed at different collection rates. However, no more than five collection rates may be permitted per table limit. The approved collection fees and schedules for the game of Pure Spanish 21.5 Blackjack are as shown below:

### **Description of Table Used and Total Number of Seated Positions**

Crazy 4 Poker will be played on a standard blackjack table having eight places on one side for the players and the player-dealer, and a place for the house dealer on the opposite side. The cloth covering a Crazy 4 Poker table (table layout) will have betting areas for eight players including the player-dealer. Each Crazy 4 Poker table will have a drop box attached to it.

The table layout will bear an inscription to the effect that the “Player-Dealer qualifies with king-high.” Within each player position there will be four separate designated betting spaces labeled for the placement of bets. In addition, the appropriate Queens Up and Super Bonus pay tables will be printed on the layout within each player position.

The wagering areas will be designated as follows:

- Ante wagers will be placed on the word “Ante”;
- Super Bonus Bets will be placed on the words “Super Bonus”;
- Queens Up Bonus Bets will be placed on the words “Queens Up”; and
- Play wagers will be placed on the word “Play.”

### **Dealing Procedures and Round of Play**

1. Third-Party Providers of Proposition Player Services (TPPPS), as defined in Section 19984 of the California Business and Professions Code, are permitted to play.
2. Backline betting is not permitted on any wager.
3. At the beginning of each round of play, each player must place an Ante bet and a Super Bonus Bet. The player may also place an optional Queens Up Bonus Bet.
4. After each player has had the opportunity to place their bets, the house dealer will announce “no more bets.”
5. Immediately prior to the commencement of play and after each round of play has been completed, the house dealer will shuffle the cards by use of a shuffle machine so that the cards are randomly intermixed. Upon completion of the shuffle, the device will place the deck of cards in a single stack.
6. The shuffler deals the cards in stacks of five. The house dealer will deliver the first stack of cards dealt by the shuffler to the player to the left of the player-dealer. As the remaining stacks are dealt by the shuffler, the house dealer will deliver a stack in turn to each of the other players, including the player-dealer, moving clockwise around the table. The house dealer will deliver each stack face-down.

## Crazy 4 Poker

7. After the stacks have been dealt and delivered to each player and the player-dealer, the house dealer will unload the remaining cards in the shuffler and place them into the discard rack without exposing the cards. This will also initiate shuffling of the deck for the next round of play.
8. After the dealing procedures above have been completed, each player will examine their cards.
9. Each player who wagers in Crazy 4 Poker will be responsible for their own hand and no person other than the player or the house dealer may touch the cards of that player. Each player will be required to keep their five cards in full view of the house dealer at all times.
10. After examination of the cards, each player who has placed an Ante wager will have the option to either make a Play wager or fold. If a player ends their participation in the round of play by folding, the player loses the Ante, Super Bonus and, if applicable, the Queens Up Bonus Bet.
  - a. If a player makes the Play wager it must be equal to the Ante unless the player has at least a pair of aces.
  - b. If a player has a pair of aces or better, they can bet up to three times their Ante.
9. The house dealer will offer this option to each player, starting with the player to the left of the player-dealer and moving clockwise around the table in order
10. After each player has either placed a wager on the table in the play wager area or forfeited their wager and hand, the house dealer will collect all forfeited wagers and associated cards.

### **How Winners are Determined and Paid**

The house dealer will then reveal the player-dealer's cards and arrange the cards to form the highest possible ranking four-card poker hand. The player-dealer must qualify with a minimum of king-high. Wagers will be settled in the following order from player to player: the Play, Ante, Queens Up Bonus Bet, and then the Super Bonus Bet. The player-dealer will first collect all losing wagers and then pay all winning wagers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players.

1. If the player-dealer does NOT qualify with a minimum of a king-high:
  - a. Starting with the player on the house dealer's right, bring the player's hand into the "work area" between the player-dealer's hand and the Queens Up Bonus Bet and reveal the player's cards.
  - b. Pay all play bets even money and push all Ante bets. Resolve Queens Up Bonus Bet and Super Bonus Bet as usual.
2. If the player-dealer qualifies with king-high or better:
  - a. Starting with the player on the house dealer's right, bring the player's hand into the "work area" between the player-dealer's hand and the Queens Up Bonus Bet and reveal the player's cards.
  - b. If the player's hand is higher than the player-dealer's, the play and Ante bets are paid even money.
  - c. If the player-dealer's hand beats the player's hand, the player loses.
  - d. If the player-dealer's hand and the player's hand are equal in rank and value, the hand is considered a tie and the Ante and play wagers will push and be returned to the player.
  - e. Reconcile the Queens Up Bonus Bet and Super Bonus Betas normal.
3. All cards collected by the house dealer will be picked up in order and placed in the discard rack in such a way that they can be readily arranged to reconstruct each hand in the event of a question or dispute.

- If the player's hand does not qualify for a payout, the player-dealer collects the Queens Up Bonus bet.
- The player-dealer will pay all winning Queens Up Bonus Bets and will collect all losing Queens Up Bonus Bets.

## Face Up Pai Gow Poker

- d. Once the cards have been stacked, the player-dealer randomly selects which pile will be distributed to the first player who receives the "Action" button.
- e. The house dealer identifies the hand by placing a button marked Action on this pile by pushing the button forward and turning the pile behind it sideways.
7. To determine the placement of the first pile of cards, the player-dealer shakes a dice cup containing three standard dice.
  - a. The sum of the dice indicates the seat the pile of cards will be distributed. The player-dealer's position is always one, eight, and fifteen. Other seats, in clockwise rotation, respectively represent the other numbers.
  - b. If the numerical total of the dice represents a seat/spot without any wagers placed, the Action button will be placed at the first active seat/spot clockwise from the original seat/spot.
8. Once all of the piles of cards have been distributed, the house dealer will collect the cards distributed to seats without a wager and place them in the discard pile.
9. The player-dealer's hand will then be exposed and set according to the house way chart below, before the player's sent their hands.
  - a. If the player-dealer has an ace-high seven-card hand, all player's wagers shall push and any Ace-High Bonus Bets will win.
  - b. If the player-dealer's hand does not contain a seven-card ace-high, each player shall then set their hand by arranging the seven cards into a two-card hand, which is placed in front of the five-card hand, and a five-card hand, which is placed behind the two-card hand.
    - i. The five card hand must rank higher than the two-card hand, according to the hand rankings as shown above.
  - c. Players do not have to set their hand the "House Way", they are free to set the hand in any fashion they choose as long as it is not a foul hand. If a player arranges the two-card hand so it out-ranks the five-card hand, this will be considered a foul and the player will automatically lose their wager.

10. Once the player-dealer's hand is set according to the House Way, each player's hand is exposed, in turn, and compared to the player-dealer's hand to determine the winners, losers, or push hands.
  - a. Each player's five-card hand will be compared to the player-dealer's five-card hand, and each player's two-card hand will be compared to the player-dealer's two-card hand, in turn.
11. Wagers will be settled in a clockwise manner around the table, starting with the player with the Action button.
12. All wagers will be settled from seat to seat, including backline bettors, in the following order: the base game wager, then the Fortune Bonus Bet, Envy Bonus and then the Ace-High Bonus Bet. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the respective players.

### **How Winners are Determined and Paid**

Once each player has set their hands and the house dealer has set the player-dealer's hand, each player's hand shall be compared against the player-dealer's hand. The following shall apply for each possible outcome when determining which hand wins, loses, or if there is a "push."

- The Face Up Pai Gow Poker base game wager wins if the two-card hand and the five-card hand, held by the player, ranks higher than the player-dealer's two-card hand and five-card hand. Winning base game wagers are paid 1 to 1.

## Face Up Pai Gow Poker

- The Face Up Pai Gow Poker base game wager loses if the two-card hand and the five-card hand held by the player, ranks lower than the player-dealer's two-card hand and five-card hand.
- The Face Up Pai Gow Poker base game wager "pushes" if one of the hands held by the player ranks higher than the player-dealer's corresponding hand, and the player's other hand ranks lower than the player-dealer's corresponding hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
- If either the two-card hand or the five-card hand is identical in rank to the player-dealer's two-card hand or five-card hand, it is a "copy hand." The player-dealer wins all copy hands.
- When the player-dealer's hand is an ace-high seven-card hand, all player's hands shall push and their wagers shall be returned.
- Once the standard base game wagers are settled (win, lose, tie/push) the house dealer will determine if the player's hand qualifies for the Fortune Bonus and/or the Envy Bonus.
- The player-dealer shall pay all winning Fortune Bonus Bets made by players when a player has one of the qualifying hands described below.
- The player-dealer shall collect all losing Fortune Bonus Bets made by players when a player does not have one of the qualifying hands listed below.
- A player qualifies for an Envy Bonus payout when a player places a Fortune Bonus Bet of at least \$5. The player-dealer shall pay all winning Envy Bonus' when a player at the table receives a Four of a Kind or higher, excluding the player-dealer hand or their own hand.
- The player-dealer shall pay all winning Ace-High Bonus Bets made by players when the player-dealer's or the player-dealer and player's hand is an ace-high seven-card hand.
- The player-dealer shall collect all losing Ace-High Bonus Bets made by players when the player-dealer's hand is not an ace-high seven-card hand.

## Face Up Pai Gow Poker

### Collection Procedures

- California games utilize a player-dealer position. The position shall be offered systematically and continuously in a clockwise manner around the table after every two hands.
- All base game wagers, including bonus bets, are collected or paid, to the extent that the player-dealer's wager covers.
- Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players.
- The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.
- Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed above, shall be used at a gaming table at any one time.
- Collection rates and fees shall be determined prior to the start of play of any hand or round. Rates shall not be calculated as a fraction or percentage of wagers made or winnings earned.
- Flat fees on wagers may be assessed at different collection rates; however, no more than five collection rates may be established per table.
- Turlock Poker Room shall provide ample notice to patrons regarding the collection rates and fees, as well as the procedure for collecting them.
- Collection fees shall be conspicuously posted on or within view of every gaming table.
